HKS CT230R

(Previously known as TRB-02)

HKS / Garage R proudly present the HKS CT230R! Despite utilizing its stock Lancer production monocoque chassis, this record smashing machine has earned its reputation as the undisputed fastest circuit car in Japan, beating even the quickest times set by professional GT teams and their specially designed "works" performance machines.

TSUKUBA RECORD BREAKER

Nobuteru "NOB" Taniguchi

Making its first appearance in South East Asia, Garage R's objective is to smash the quickest recorded lap times set in Sepang F1 Circuit by top Japanese and European marques.

Our goal of 2 minutes 10 seconds is something that is not unheard of. The challenge is to achieve this awesome time using semi-slick compound tyres!

Tasked to execute this amazing feat is none other than the charismatic Nobuteru "NOB" Taniguchi. A renowned figure in the Japanese Motorsports scene with countless victories to his name; from Super Taikyu to D1 Professional Drift Series; NOB (a.k.a. "No One Better") was also one of the drivers responsible for piloting the GR-ED01 DC-5 Integra Type-R to victory in last year's Merdeka Millennium Endurance (MME) event.

A Time Attack challenge will be held at the Sepang F1 International Circuit on April 16 2007 where a list of accomplished drivers, both local and overseas have been invited to attempt to better NOB's lap time. Witness this widely anticipated event live!
